

# Rotavapor® R-100

## Economical evaporation

The R-100 is an entry level Rotavapor® to meet the essential needs in evaporation and BUCHI's high quality standards.

**Economical**  
Designed to meet essential needs

**Solid and proven**  
User-friendly design at well-known BUCHI quality

**Expandable**  
Increase efficiency by expanding to a complete solution

## R-100: Your most important benefits

### Economical

- Effective Rotavapor for limited budgets
- Fundamental design fulfills essential needs of evaporation
- High longevity thanks to high quality material

### Solid and proven

- Reliable operation due to robust design
- Quick and ergonomic operation with smooth manual lift mechanism
- Easy flask handling and vapor duct removal thanks to multifunctional Combi-Clip

### Expandable

- Easy operation by integrating interface, vacuum pump and recirculating chiller
- Expandable with a wide range of accessories and various glass assemblies
- Flexibility to use the independent heating bath for further applications

## Complete your portfolio

Vacuum Pump  
V-100  
Economical  
vacuum source

Interface  
I-100  
Economical vacuum  
regulation

Recirculating Chiller  
F-100 / F-105  
The easy way of cooling

Multivapor™  
P-6 / P-12  
Efficient evaporation  
for multiple samples
